All "Made in SCM Italy"
From casting iron to finished product.

Come see our production plants and touch the quality of SCM machines; you will be our guest.

minimax line

the passion that deserves
professional products

minimax is the Line of professional machines for hobbyists and woodworkers,
a point of reference for over 40 years worldwide.
The minimax models are part of the entire scm range of woodworking machines, and as
such, maximum expression of technological innovation in the sector.

Saw Unit
double tilting

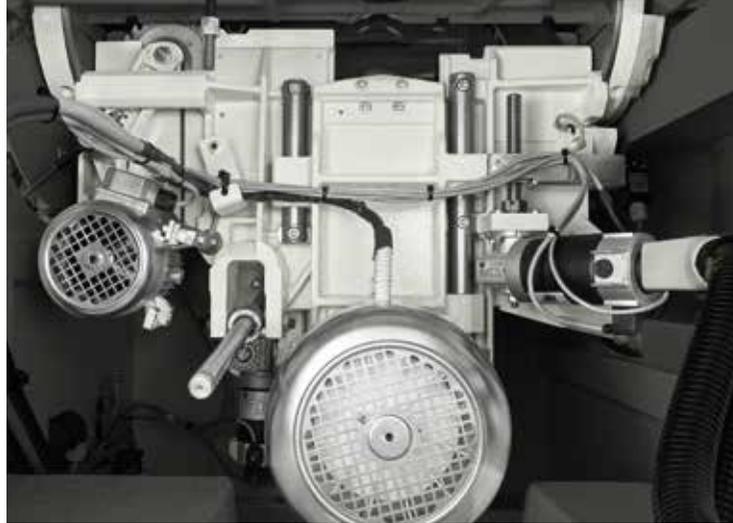

**Programmed
Mouvement**
simple and quick

Ready 3/ Ready 3 UP
automatic
positioning

Circular saw with $\pm 46^\circ$ double tilting with powered and programmed sawblade movement available as standard. It allows simultaneous use of a 400mm saw blade and 160mm scoring blade both for 90° cutting and $\pm 46^\circ$ tilted cutting.

six
operating
groups

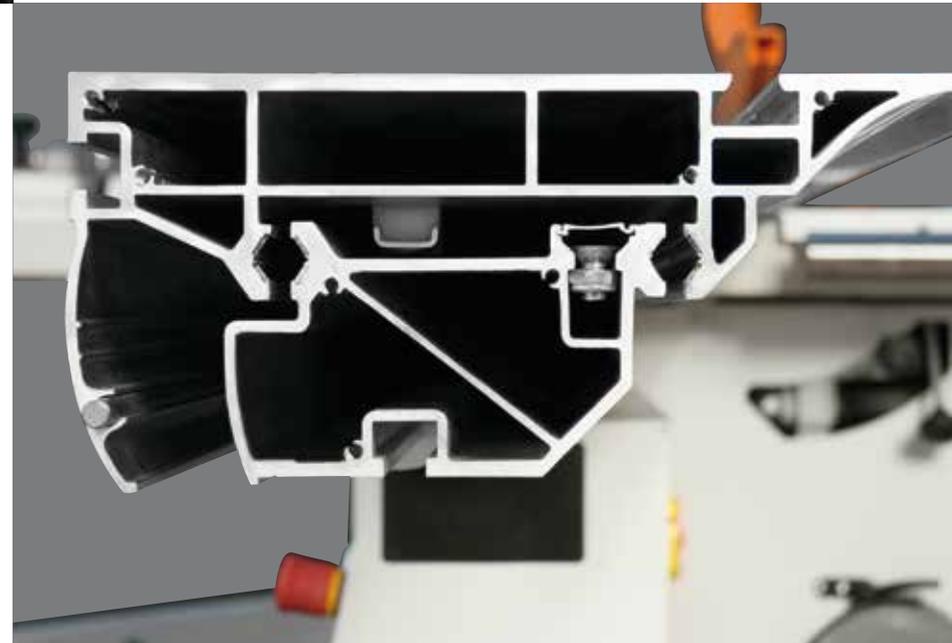

double tilting at everybody's reach
Saw Unit.

New saw unit with a stiff cast-iron structure which can accommodate a blade of 400 mm diameter with scoring blade mounted. It ensures a perfect and easy cutting of veneer panels and thick solid wood material with very high thickness both at 90° and tilted cuts at $\pm 46^\circ$. The saw blade uses 100% of the motor power, thanks to the scoring blade with an independent motor as standard.

The scoring blade is adjustable from the outside without tools and allows fast and accurate positioning with no play.

unrivalled cutting finishing
Sliding Table.

Optimal support also to larger pieces, with the **new sliding table, 360 mm wide.**

Exceptional precision and smoothness to secure the guides it is not used glue, since the thickness could affect sliding. They are secured with a procedure of aluminum riveting.

simple and quick
Programmed movement.

The "Ready" control manages the powered and programmed movement of the sawblade unit increasing productivity and working quality.

Two positions overhead
blade protection for totally
safe machining.

immediate control
Squaring Frame and Fence.
Panel loading is easy on the
large squaring frame with an idle
roller at the end. The telescopic
squaring fence with the inclined
metric scale and two reversible
stops can be used to square panels
measuring 3200 x 3200 mm and
for miter cuts at up to 45° on
both sides of the frame.

si x main optional devices

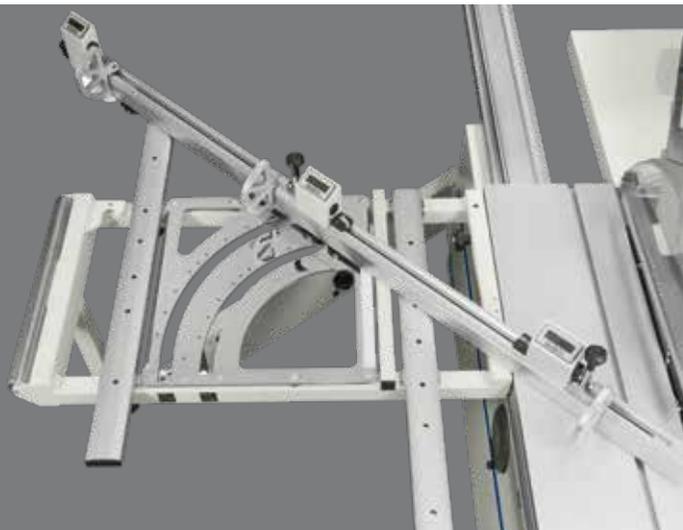

Ready 3 / Ready 3 UP
Automatic positioning of the parallel fence, from "Ready" control (3 axes). Programmed or manual fence movement with a hold-down drive for the maximum versatility. In addition the Ready 3 UP version has the control on the mobile control panel.

2 sawblades speeds
The two sawblade rotating speeds (3500 - 5000 rpm) are controlled by inverter.

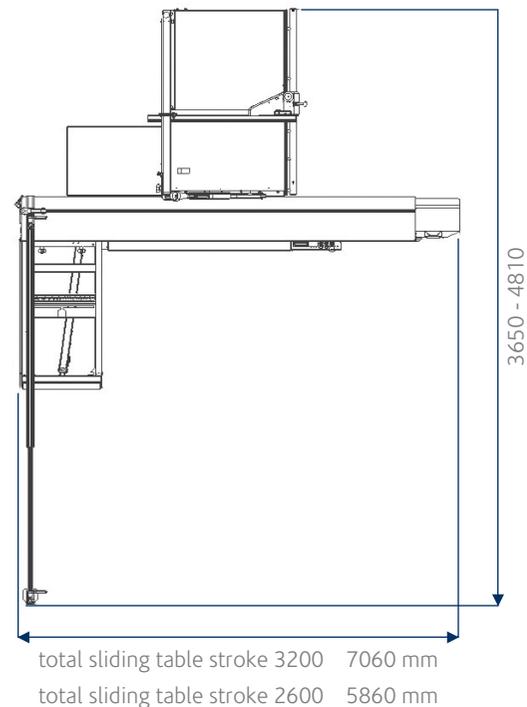

Compex
to rapidly obtain angular cuttings with automatic self-adjusting of the stop position.

Digital readouts
on squaring stops with micrometric adjustment.

elite s
operating
groups

RANDO
TECHNIC

The lifting of the blade unit is done by a robust cast iron structure with dovetail system.

The rotation fulcrums of the saw unit have a 120 mm diameter and stand on steady crescent shaped rests that separate it from the base: a rigid reliable solution.

unique worldwide

Saw Unit.

Unique in the world in its category, with a cutting height of 118 mm. The cast iron saw unit with a rigid **closed loop structure** can accommodate a blade of 315 and 350 mm diameter (up to 400 mm for si 400 es) **with the scoring blade mounted**, ensuring perfect and easy cutting of veneer panels and thick solid wood material. The saw blade uses 100% of the motor power, thanks to the **scoring blade with an independent motor as standard**.

The scoring blade is adjustable from the outside without tools and allows fast and accurate positioning with no play.

high-tech devices
Controls on Wagon.

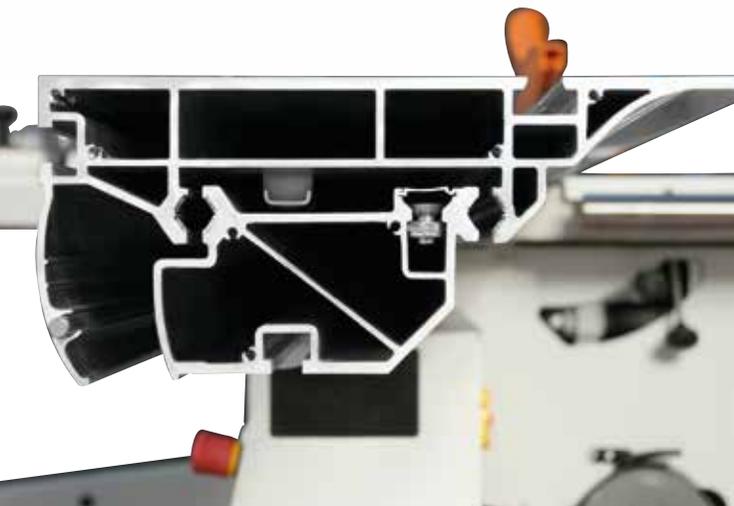

Wide range of high-tech devices to make your es even more powerful and personalized, like the **start/stop pushbuttons for the main blade and scoring blade integrated in the sliding carriage**; very useful when machining large dimensioned work pieces that prevent an easy and safe access to the main machine control panel.

immediate control

Squaring Frame and Fence.

Panel loading is easy on the large squaring frame with an idle roller at the end. **The telescopic squaring fence with the inclined metric scale and two reversible stops** can be used to square panels measuring 3200 x 3200 mm and for miter cuts at up to 45° on both sides of the frame.

unrivalled cutting finishing
Sliding Table.

Optimal support also to larger pieces, with the **sliding table 360 mm wide**. Exceptional precision and smoothness: to secure the guides it is not used glue, since the thickness could affect sliding. They are secured with a procedure of aluminum riveting.

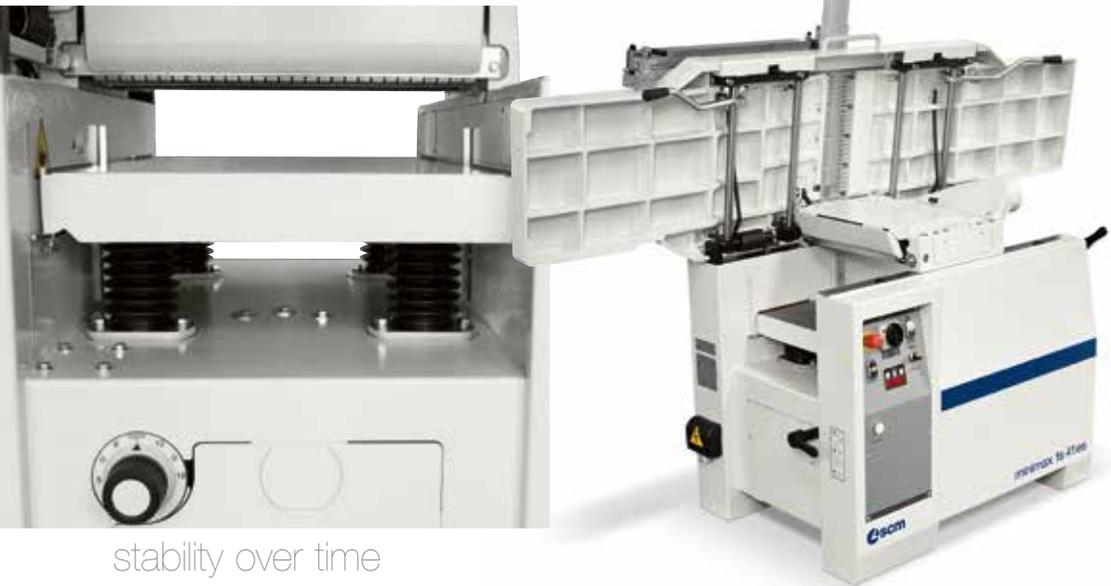

**RANDO
TECHNIC**

elite s operating groups

absolute rigidity

Planing Fence.

High rigid fence with a smooth movement thanks to the **central locking on round bar**.

stability over time

Tables Lifting.

Comfortable and precise planing. The es series adopt ergonomic solutions like the **2200 mm surfacing tables**, in ribbed cast iron, **with simultaneous opening** towards the inside of the machine with a 90° angle. For a maximum long lasting stability the cast iron thickening table lifts on **4 spindles with trapezoidal threads dust protected**.

perfect finishing

Planer Cutter Block.

An optimal planing with minimal effort, thanks to the 95 mm diameter cutter block (120 mm in planers of 520 mm working width) and 4 knives. For an impeccable finish the pressure of the thickener feed rollers can be adjusted according to the type of wood machined. The roller infeed (A) has a **helicoidal profile** to guarantee firm and constant work piece feed, while the outfeed roller (B) in sandblasted steel maintains the perfect post-processing finishing.

A

B

The spindle is surrounded by a cast iron "cup" to **protect the internal mechanical components** from shavings and sawdust.

unsurpassed moulding

Spindle Moulder.

Maximum stability and rigidity in all working conditions, thanks to a large spindle moulder column made entirely of cast iron. The 4 standard speed are ideal for any type of machining, from moulding to routing and tenoning, with the possibility to fit tools up to 320 mm of diameter (300 mm no CE).

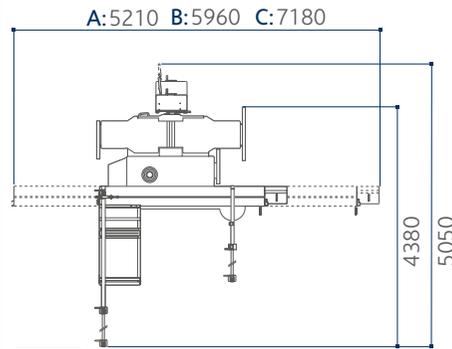

high-tech devices

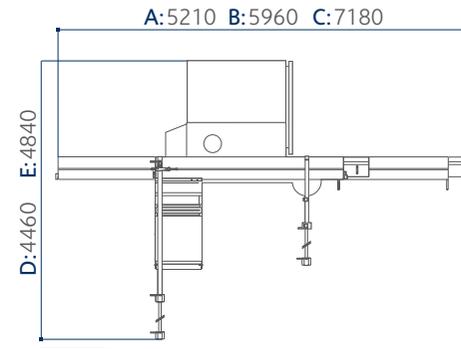

Moulder Guide.

The spindle moulder hood uses a system for adjusting the guides with a rack and it is fitted with a mechanical digital readout. Thanks to the **system of memories** (on **t 55es** and **tw 55es** available as option) the hood can be removed and repositioned without losing the machining position. The maximum tool diameter mounted on the spindle lowered under the table at 90° is 240 mm. On request it is available with a spindle that tilts 45° (towards the inside of the machine).

elite s
main
optional
devices

angular cutting device with flip-over stops
To rapidly perform mitre cuts without moving the squaring fence.
Recommended for mitre cuts on small work pieces.

additional table on the sliding carriage
For the support of large dimensioned panels.

pre-set angular
cutting device
directly positioned
on squaring frame
To find rapidly the most
common angles with the
squaring fence. Useful for
large work pieces.

digital readout
for the fence
position on the
parallel fence
It allows precise
positioning with the
magnetic strip sensor.

cast iron mortiser
Drilling holes and mortises are easily carried out. Complete with exhaust hood, 120 mm diameter and 16 mm chuck.

overhead blade protection
For totally safe machining.

maintenance case for
"Xylent" spiralknife

Complete with:

- 1 cleaning/degreasing liquid bottle for the resins cleaning
- 1 set dynamometric key
- 2 bit Torx
- 10 inserts
- 5 screws
- 1 brass bristle brush to clean the spindle with mounted in inserts
- 1 steel bristle brush to clean the inserts housings

"Tersa" cutter block

Automatic knives clamping by means of the centrifugal force ensures safe and precise machining. The system, without fixing screws, makes knives substitution extremely fast.

"Xilent" spiralknife cutter block with 3 series of knives

The 3 spiralknives give an exceptional finish. Reduced noise during machining provides a more comfortable working environment. It also improves the dust extraction due to the production of very small chips. Each cutter has 4 tips which can be rotated into the cutting position when worn. Therefore increasing the production life of the cutter block before knives require replacement.

elite s main optional devices

self-centering
chuck 0-16 mm
"Wescott" type

The mortiser spindles can be rapidly substituted without the necessity of adjustment.

chuck with clamp
It allows harder machining thanks to the stronger bits. The chuck includes 3 clamps 5/10/16 mm.

thickening
table with two
removable
idle rollers
It assists the feed for
demanding pieces.

additional overturning
fence for thin work pieces
It ensures optimum operator safety
when machining thin work pieces.

complex
to rapidly obtain angular
cuttings with automatic
self-adjustment of the
stops position.

dado set
mechanical presetting to
use a tool (not included) in
place of the main blade.

ready 3 /
programmed
parallel fence
automatic parallel fence
positioning, available for
version with 1 and 3 axes.

digital readouts
on squaring stops with
micrometric adjustment,

tenoning table and protection hood

For the tenoning operations on the spindle moulder. It consists of:

- table
- protection hood for tools, 320 mm diameter (300 mm USA/Canada)
- exhaust hood, 120 mm diameter

electric pre-setting and flip over support for feeder

This solution allows a total exclusion of the device and prevents interference with other parts of the machine.

A

B

interchangeable spindle (A)

For a very quick spindle substitution. Among the spare spindle, it is available also the spindle for router bits. (B)

roller telescopic extensions for spindle moulder

For the machining of work pieces with large dimensions.

powered handling of the operating groups with digital readouts

For the best precision and easy-to-use.

Sliding Table
precise and silent

elite operating groups

stability and rigidity

Saw Unit.

The new **saw unit closed loop structure is made of a heavy cast iron** and is supported firmly under the table by two lateral supports in a crescent shape. These solutions give strength and rigidity, guaranteeing perfect cutting results. The saw unit can be equipped, on request, with scoring blade for perfect cutting even on veneered panels. The scoring blade is an option available in two versions: with belt transmission from the main motor and with an independent motor 0.75 HP (0.55 kW). The maximum diameter allowed for the main saw is **315 mm with scoring blade mounted**.

The lifting of the blade unit is done by a robust cast iron structure with dovetail system.

The rotation fulcrums of the saw unit have a 120 mm diameter and stand on steady crescent shaped rests that separate it from the base: a rigid reliable solution.

The scoring blade is adjustable from the outside without tools and allows fast and accurate positioning with no play.

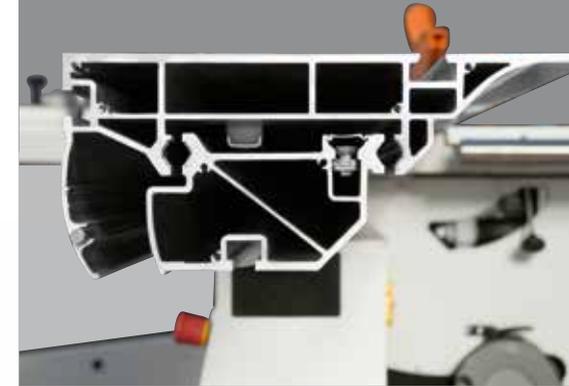

precise and silent

Sliding Table.

Optimal support also to larger pieces, with the **sliding table 360 mm wide**. Exceptional precision and smoothness: to secure the guides it is not used glue, since the thickness could affect sliding. They are secured with a procedure of aluminum riveting.

high-tech devices

Digital Readout.

The round cross-section sliding bar for the parallel fence (optional device for **cu 410e**) with micrometric adjustments ensures a smooth, fast and especially precise positioning of the fence. The support of the fence can also be equipped with a **digital readout**, with the sensor running on a magnetic stripe (option).

Panel loading is easy on the **large squaring frame** with an idle roller at the end. The **telescopic squaring fence with two reversible stops** can be used to square panels measuring 3200 x 3200 mm and for miter cuts at up to 45° on both sides of the frame.

elite operating groups

perfect finishing

Planer Cutter Block.

The planer unit stands on cast iron supports and the standard version has a 87 mm diameter cutter block with 3 knives. (The optional "Tersa" cutter block is available with 4 quick tightening knives and automatic adjustment).

For an impeccable finish, the pressure of the thicknesser feed rollers can be adjusted according to the type of wood machined.

The infeed roller (A) has a **helicoidal profile** to guarantee firm and constant work piece feed, while the outfeed roller (B), in sandblasted steel, maintains the perfect post-processing finishing.

A

B

Two feed speed for the standard thicknesser (6 - 12 m/min.). In the **cu 410e** the planers open towards the circular saw-spindle moulder side: an ergonomic solution with minimum amount of space.

functional and customisable

A machine even more versatile: with the practical **mortiser** (option) drilling holes or mortises are easily done.

The **fs 41e** uses a dedicated planing fence extremely rigid and smooth, thanks to a support with central round bar.

versatility

Spindle Moulder.

Maximum stability and rigidity in all working conditions, thanks to a large spindle moulder column made entirely of cast iron.

The 4 standard speed are ideal for any type of machining, from moulding to routing and tenoning with the possibility to fit tools up to 275 mm of diameter. The spindle is surrounded by a cast iron "cup" to protect the internal mechanical components from shavings and sawdust.

high-tech devices

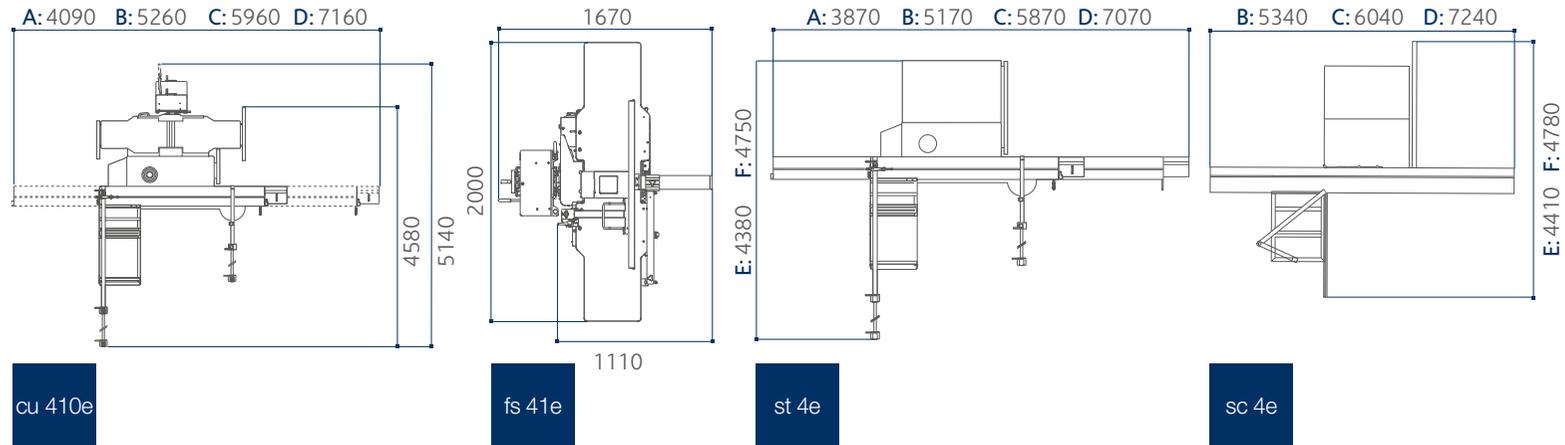

Moulder Fence.

The standard spindle moulder hood (A) can house tools of maximum diameter 210 mm. Available as an option, the spindle moulder hood that uses an adjustment system of the guides through rack and it has a mechanical digital readout (B). Thanks to the **memories system**, this hood can be removed and replaced without losing the operating position.

The maximum capacity of the tool used in profiling is 240 mm in diameter. It is available, on request, the tilting spindle 45° towards the inside machine.

elite
main
optional
devices

additional table on the sliding carriage
For the support of large dimensioned panels.

angular cutting device with flip-over stops
To rapidly perform mitre cuts without moving the squaring fence.
Recommended for mitre cuts on small work pieces.

overhead blade protection
For totally safe machining.

pre-set angular
cutting device
directly positioned
on squaring frame
To find rapidly the most
common angles with the
squaring fence. Useful for
large work pieces.

digital readout for the fence
position on the parallel fence
It allows precise positioning with the
magnetic strip sensor.

"Tersa" cutter block

Automatic knives clamping by means of the centrifugal force ensures safe and precise machining. The system, without fixing screws, makes knives substitution extremely fast.

cast iron mortiser

Drilling holes and mortises are easily carried out. Complete with exhaust hood, 120 mm diameter and 16 mm chuck.

"Xilent" spiralknife cutter block with 3 series of knives

The 3 spiralknives give an exceptional finish. Reduced noise during machining provides a more comfortable working environment. It also improves the dust extraction due to the production of very small chips. Each cutter has 4 tips which can be rotated into the cutting position when worn. Therefore increasing the production life of the cutter block before knives require replacement.

self-centering chuck 0-16 mm "Wescott" type

The mortiser spindles can be rapidly substituted without the necessity of adjustment.

maintenance case for "Xilent" spiralknife

Complete with:

- 1 cleaning/degreasing liquid bottle for the resins cleaning
- 1 set dynamometric key
- 2 bit Torx
- 10 inserts
- 5 screws
- 1 brass bristle brush to clean the spindle with mounted in inserts
- 1 steel bristle brush to clean the inserts housings

chuck with clamp

It allows harder machining thanks to the stronger bits. The chuck includes 3 clamps 5/10/16 mm.

additional overturning fence for thin work pieces
It ensures optimum operator safety when machining thin work pieces.

A

B

interchangeable spindle (A)
For a very quick spindle substitution. Among the spare spindle, it is available also the spindle for router bits. (B)

tenoning table and protection hood
For the tenoning operations on the spindle moulder. It consists of:

- table
- protection hood for tools, 275 mm diameter
- exhaust hood, 120 mm diameter

dado set
mechanical presetting to use a tool (not included) in place of the main blade.

electric pre-setting and flip over support for feeder
This solution allows a total exclusion of the device and prevents interference with other parts of the machine.

performance without limits

Saw Unit.

Incredible cutting of both very thick solid wood and panels, even those veneered, thanks to the new saw unit with a blade that has a maximum diameter of 315 mm with the scoring blade installed.

The new **scoring unit** can be supplied on request and **can easily be adjusted from outside the machine.**

A clean machine environment facilitates maintenance avoiding mechanical breakdowns of the units and improving the machine's precision and reliability over time. Very high effective saw unit exhaust hood: the tests carried out by Scm's studies highlighted a **maximum dust emission level 90% lower with respect to the maximum level allowed by the European safety regulations!**

Machining	Maximum value according to the CE norms	Position A	Position B	Position C	Position D
Strips cut	2 mg/m ³	0.08 mg/m ³	0.10 mg/m ³	0.04 mg/m ³	0.16 mg/m ³

exclusive

Sliding Table.

Easier and more precise cutting is possible due to a perfectly stable support that is guaranteed, even for large work pieces, by the **wide sliding table** and the **large squaring frame fence provided as standard**. **Top quality precision, smooth and silent action, self-cleaning dustproof system, long lasting accuracy, no adjustments required.** The sliding table is made of extruded anodized aluminum with a closed honeycomb structure. The sliding table runs on an exclusive slide way system consisting of calibrated and hardened F550 SX steel guides.

maximum performance as standard

Squaring Frame and Fence.

The **sc 2c** squaring frame (A) is complete with a telescopic fence with a retractable stop. The other classic machines (B) are equipped with a **large squaring frame (960 x 600 mm)** complete with:

- telescopic fence with 2 flip-over stops
- eccentric clamp
- telescopic swinging arm support

cu 300c and **cu 410c** are equipped with a saw-planer multifunction fence, designed to be easily positioned and removed to allow **rapid work changeover**.

Precise and rapid positioning with the parallel fence with a **round sliding bar**, in rectified steel and complete with "high rigidity" cast iron support, standard for all the other Classic machines. (see picture)

RANDO
TECHNIC

classic operating groups

optimal planing

Planer Cutter Block.

The planer unit in the standard version has a 72 mm diameter cutter block with 3 knives (the optional "Tersa" cutter block is available with quick tightening knives and automatic adjustment). For an impeccable result, the pressure of the thickener feed rollers can be adjusted according to the type of wood machined. The thickener infeed roller (A) **has helical tooling** to guarantee strong, constant work piece feed. In contrast, the sandblasted steel outfeed roller (B) maintains the perfect post-machining finish.

absolute rigidity

Surfacing Fence.

Very high rigidity of the **fs 30c** and **fs 41c** surfacing fences made of extruded aluminum with respectively 1300 and 1670 mm length.

exceptional accessibility

Surfacing Tables Opening.

Thickening is more comfortable: during the changeover from surfacing to thickening **the surfacing tables open towards the inside of the machine, with a 90° angle, and simultaneously.** Work pieces with a maximum height of 230 mm can be machined to the thickener. **The new design of the dust conveyor, protecting the cutter block, is specifically intended to further increase system safety and efficiency.**

On request, it is available the 45° tilting spindle, toward the inside of the machine (for **st 3c** and **tw 45c** only).

professional and very sturdy

Spindle Moulder Unit.

The unit has a cast iron structure. It is closed off by a cast iron “cup” to **protect mechanical components inside the machine** from sawdust, shavings and dirt. **Precise and safe machining** with the spindle moulder fence with micrometric adjustment complete with vertical and horizontal pressers.

customisable for any requirement

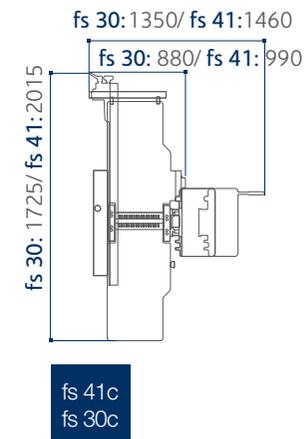

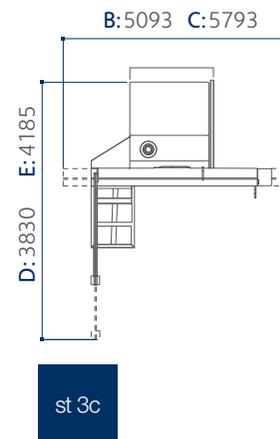

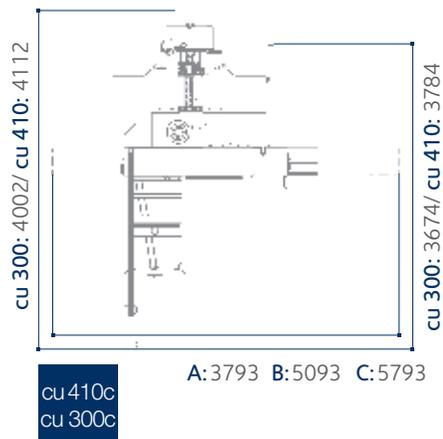

Table Extensions and Frame Support.

On **t 45c**, the table extensions at outfeed and infeed and the telescopic front support with support rollers (options) make easier the machining of large dimensions work pieces.

The 270 mm sliding table on **tw 45c**, provides a greater support, very useful also for tenoning. Precise cuttings, even for large work pieces, with the support frame (option) with telescopic fence.

higher efficiency

Surfacing Tables Lifting.

During the changeover from surfacing to thickening the **surfacing tables open towards the inside of the machine with a 90° angle**, facilitating thickening. Work pieces with a maximum height of 220 mm can be machined to the thickener. The **new design of the dust-conveyor**, protecting the cutter block, is specifically intended to **further increase system safety and efficiency.**

superior performances

Spindle Moulder.

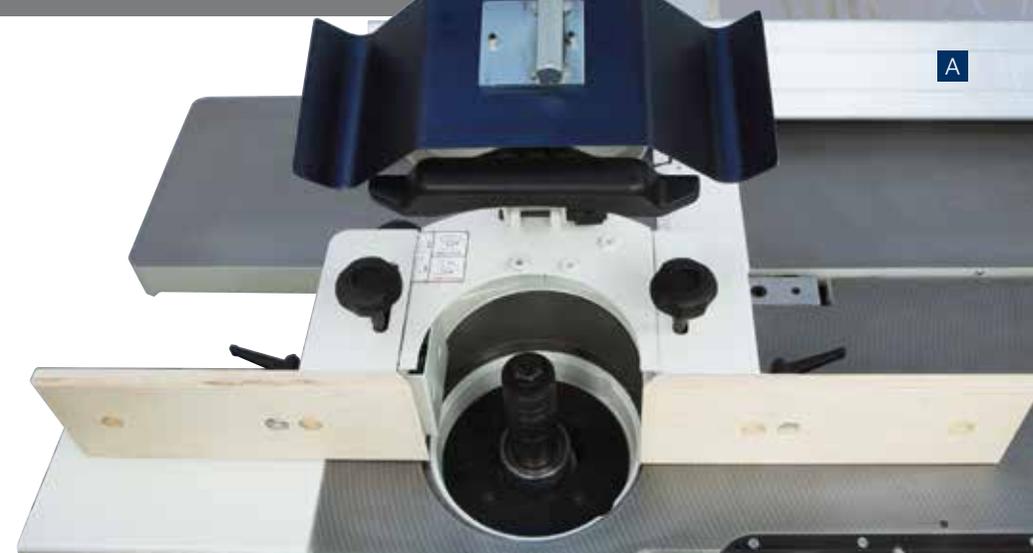

The unit (A) has a spindle with a useful working length of 100 mm. A tool with a maximum diameter of 180 mm can be retracted under the worktable. For machine maximum safety and increased flexibility, a **spindle moulder protective hood for shaping (B)** is supplied as standard.

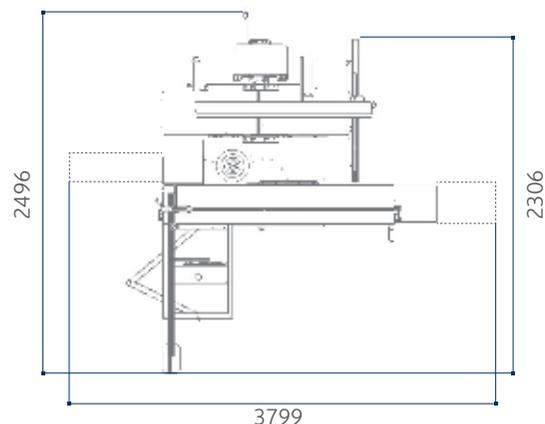

best cutting
Saw Unit.

New saw unit with a **blade that has a maximum diameter of 315 mm with the scoring blade installed.** The new scoring unit can be supplied on request and **can easily be adjusted from outside the machine.**

Easier, more precise cutting is possible thanks to perfectly stable support guaranteed, even for large work pieces, by the **270 mm wide sliding table.**

lab 300p main optional devices

tenoning table and
protection hood

For the tenoning operations on the
spindle moulder. It consists of:

- table
- protection hood for tools,
275 mm diameter
- exhaust hood, 120 mm diameter

angular cutting device with flip-over stops
To rapidly perform mitre cuts without moving the squaring fence.
Recommended for mitre cuts on small work pieces.

electric pre-setting and flip
over support for feeder
This solution allows a total
exclusion of the device and prevents
interference with other parts
of the machine.

additional table on the sliding carriage
For the support of large dimensioned panels.

professional
fences unit
For the saw and surfacing
planer. Designed to be
easy to remove and to
allow a rapid changeover
from one type of
operation to another.

"Tersa" cutter block

Automatic knives clamping by means of the centrifugal force ensures safe and precise machining. The system, without fixing screws, makes knives substitution extremely fast.

cast iron mortiser

Drilling holes and mortises are easily carried out. Complete with exhaust hood, 120 mm diameter and 16 mm chuck.

"Xylent" spiralknife cutter block with 3 series of knives

The 3 spiralknives give an exceptional finish. Reduced noise during machining provides a more comfortable working environment. It also improves the dust extraction due to the production of very small chips. Each cutter has 4 tips which can be rotated into the cutting position when worn. Therefore increasing the production life of the cutter block before knives require replacement.

self-centering chuck 0-16 mm "Wescott" type

The mortiser spindles can be rapidly substituted without the necessity of adjustment.

wheels for machine movement

maintenance case for "Xylent" spiralknife

Complete with:

- 1 cleaning/degreasing liquid bottle for the resins cleaning
- 1 set dynamometric key
- 2 bit Torx
- 10 inserts
- 5 screws
- 1 brass bristle brush to clean the spindle with mounted in inserts
- 1 steel bristle brush to clean the inserts housings

gravitational handwheel

Handwheel with gravitational numerical readout for the thickening table positioning.

cutting precision

Saw Unit.

Tilting saw unit with a 250 mm blade and a maximum blade projection from table at 90° of 80 mm. The saw unit can be raised and tilted using convenient hand-wheels. The anodized aluminum sliding table, with a 1200 mm stroke, slides **next to the blade**, thus ensuring better cutting precision.

practical and ergonomic

Thickening Planing.

To keep the machine compact and make machining easier, the surfacing table opens towards the inside of the machine. Thanks to an efficient feed system, the thickening unit can process wood up to 200 mm thick.

functional and customisable

A machine even more versatile: with the practical **mortiser** (option) drilling holes or mortises are easily done.

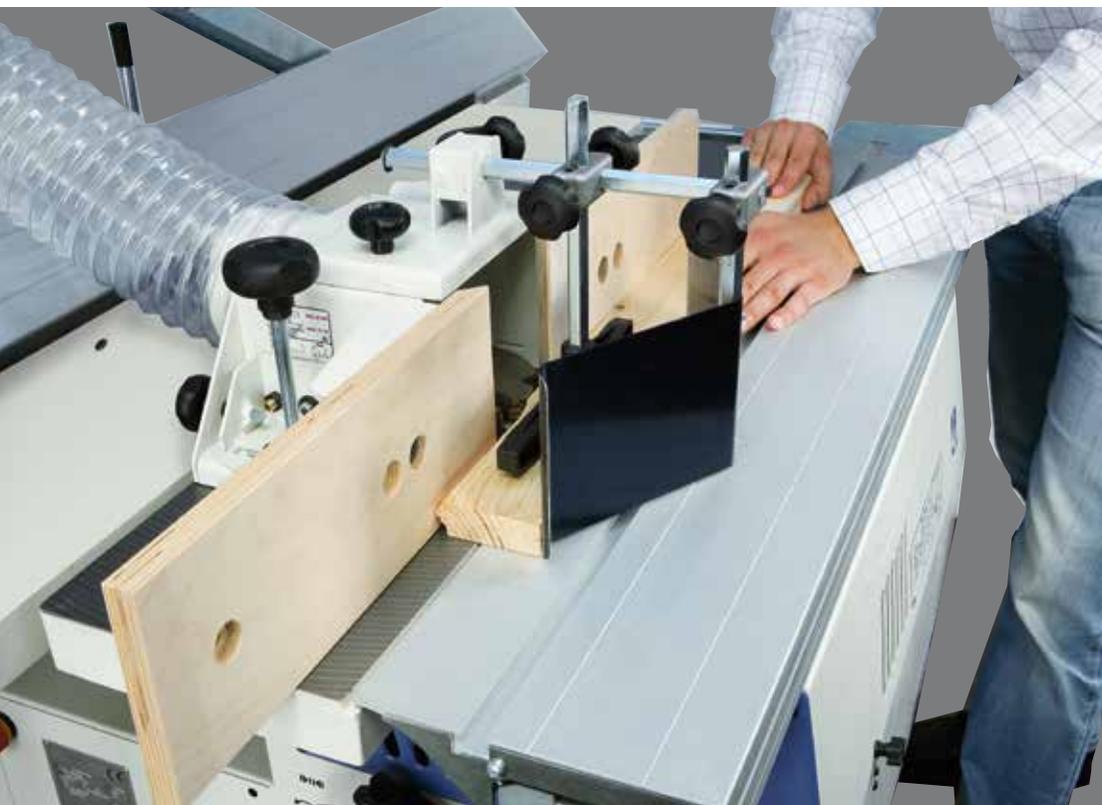

safety first
Genius machines have many **safety devices according to CE norms**, as like as the spindle moulder guard, for curved profiles and moulding shapes.

fully equipped
Surfacing Planing.

The planer unit has a cutter block with 2 re-usable knives (the "Tersa" disposable knives system with 3 knives and rapid clamping is available as an option). Genius machines also have saw-planer fences with an anodized aluminum extrusion and a support with clamp for fast positioning.

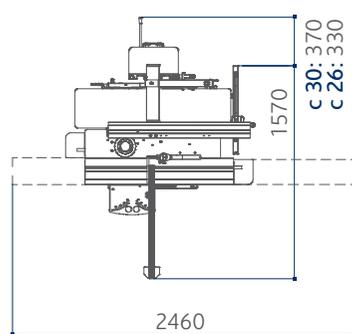

flexibility

Spindle Moulder.

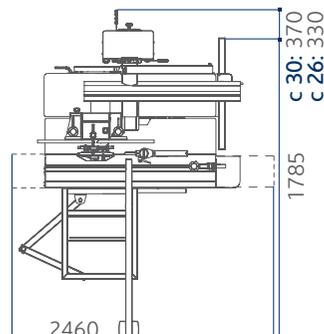

Maximum flexibility in spindle moulder tool use, with the unit with 2 speed (5000/7500 rpm). The machines have a spindle moulder fence with micrometric adjustment, a feature which is particularly useful on profiling jobs. Tenoning is easy too, thanks to the aluminum sliding table, the right speed setting and the special protection hood (option).

edge banders operating groups

me28t

me 40t/me35t

designed
for a perfect finish

Panel Conveying Track me 40.

High productivity with 9 m/min track feed speed. The encoder for feeding panel control ensures the total working cycle control.

me 35/ me 28t/ me 25.

The very best finishing of the panel edge is also guaranteed by the panel conveying track (exclusive solution), which prevents the panel having the feed affected by the typical pulses generated by the pinion of a traditional feed track and ensures a smooth and linear panel movement.

me 40

perfect edge joint line

Panel Edge Trimming Unit. me 40t/me 35t/me 28t

Panel edge surface without any imperfections before the gluing operation. Utilizes 2 tools with opposing rotation and timed intervention that, through the removal operation, corrects any panel imperfections caused by the saw cutting process and panel storage. The independent exhaust system and the air blowing device removes dust and chips from the panel.

- Widia cutters available as standard feature (me 40t/me 35t/me 28t)

deal edge application

Gluing Unit.

The glue is heated rapidly and evenly by the resistances. The **automatic lowering of the glue temperature** after a temporary halt in production when using the machine avoids burning of the glue. A new **innovative system of self-lubrication of the glue pot**, allows a more extensive use of the edge banding machine without the necessity of lubrication. Two rollers press the edge banding evenly and efficiently on to the panel edge. The glue spreading roller with electrical resistance inside provides a uniform glue spread and always at the maximum working temperature even on panels at the maximum working height.

Glue pot rapid unlocking and PU glue pot are available as an option.

always precise when cutting

End Cutting Unit.

me 40/me 35: the unit is equipped with a blade and a high frequency motor to provide the **best finishing quality** of the machined edge. Furthermore, the absence of belts or other driving systems prevents any vibration assuring **the best results at all times.** (A)

me 28t/me 25: absolute precision offered by the unit, with a cutter and an independent asynchronous motor. (B)

me 20/me 22: the efficient cutter ensures cutting always accurate. The reference is taken directly on the panel itself; consequently it doesn't require any adjustment. (C)

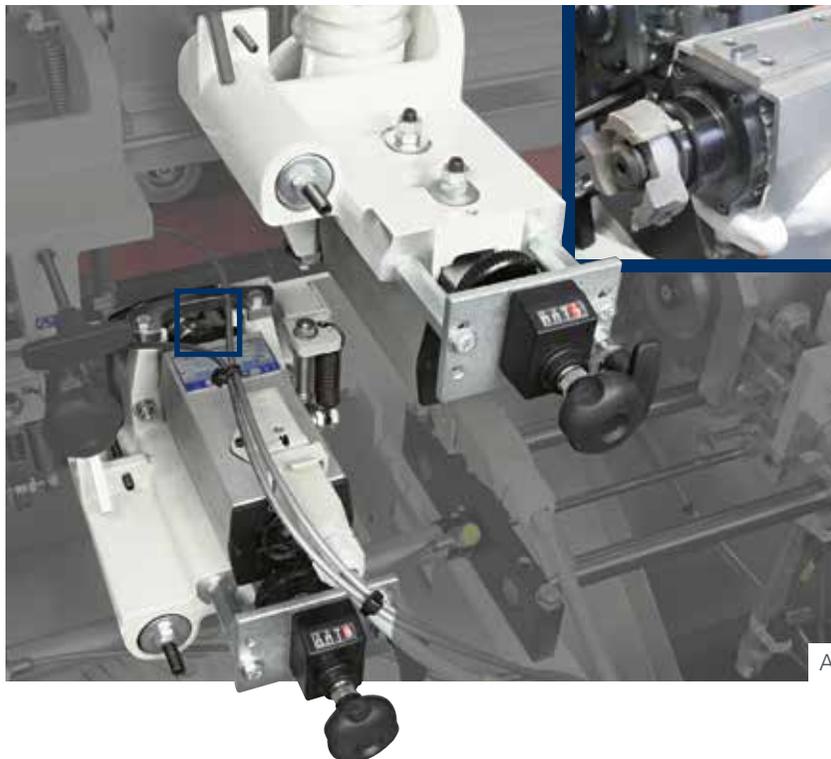

quality finishing and versatility

Trimming Unit.

me 40/me 35: very high edge quality finishing with **the rotating copiers.** **The high frequency motors** generate high cutter rotating speed, reducing to a minimum any marks left from trimming and guaranteeing the absence of vibrations. (A)

me 28t/me 25 ed me 22/me 20: the unit functions with slide copying to align perfectly to the work piece. (B) The cutters are designed for straight or radius trimming of any type of edge, whether it is thick or thin, made of PVC, ABS, melamine, laminate or wood. The edge thickness is easily set by means of two numerical readouts.

edge banders optional operating groups

ease-of-use

Automatic Loading for Edges in Strips.

me 40/me 35/me 28t/me 25

The solid wood strips are automatically loaded and synchronized with the introduction of the panels into the machine.

optimal finishing

Brushing Unit.

me 40/me 35/me 28t/me 25

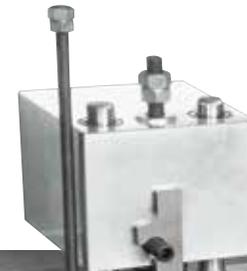

With tilted, vertically adjustable motors to optimize the cleaning/polishing action on the panel edge.

perfect edge cleaning

Glue Scraping unit.

me 40/me 35/me 28t/me 25/me 22

It eliminates any excess glue on the panel/edge joint.

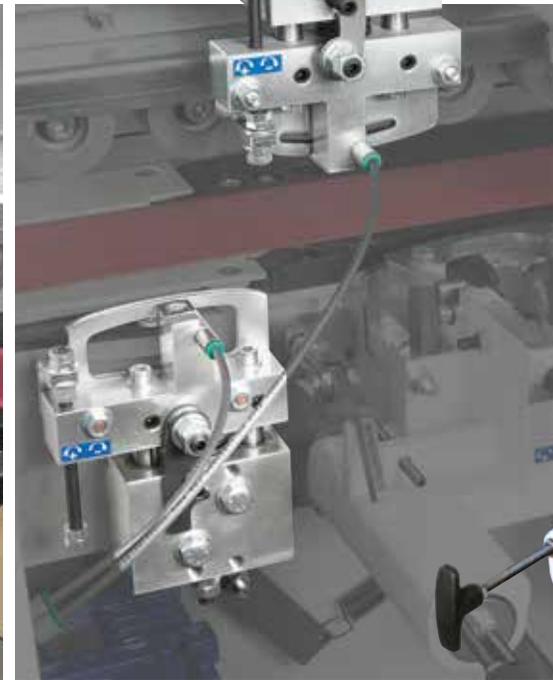

perfect radius on pvc/abs edges

Edge Scraping Unit.

me 40/me 35/me 28t/me 25/me 22

High finishing quality of plastic material edges thanks to the radius knives that ensure the complete elimination of any marks left from the trimming unit tools, all equipped with a **front and vertical disc copiers (me 35)**, and a user-friendly device for exclusion of the unit when it is not in use.

brilliant idea

End-Cutting Unit with "Radius". me 40/me 35

The optional unit allows you to make a radius on the corners of the edged panel without the need for the operator to have to finish by hand at a later stage: brilliant idea to a finished product of high quality.

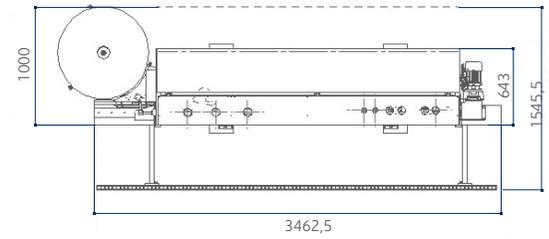

innovation at everybody's reach

Grooving Unit. me 40/me 35

The optional unit is able to perform a slot on the panel directly on the edging process, **without having to sacrifice the finishing and cleaning units.**

Drilling Head
perfect drilling operation

Cleaning System
very high efficiency

Group for Hinges
high-tech devices

Single-head multi-boring machine with 21 spindles.
Ideal solution for woodworking shops and
demanding craftsmen.

ad 21 operating groups

A perfect vertical, horizontal and at 45° drilling operation.

perfect drilling

Drilling Head.

Drilling head made from single-piece aluminium casting, to guarantee absence of vibrations. The boring unit runs on two rectified cylindrical guides which guarantee stability and precision. The machine is equipped with a mechanical revolver with 5 different boring depth adjustments. The **new dust extraction system is incredibly efficient**, and leaves the machine surprisingly clean!

The mechanical gauge guarantees fast and precise positioning of the lateral fences.

Bits replaced quickly and easily!
The machine has 21 quick-change chucks.

All controls are ergonomically positioned on the front of the machine. This includes the switch which sets the boring head at a 45° angle, allowing for an immediate changeover between operations. For perfect boring of large panels, the machine has a long 3000 mm fence with a scale and retractable stops. The fence is quickly mounted and removed easily.

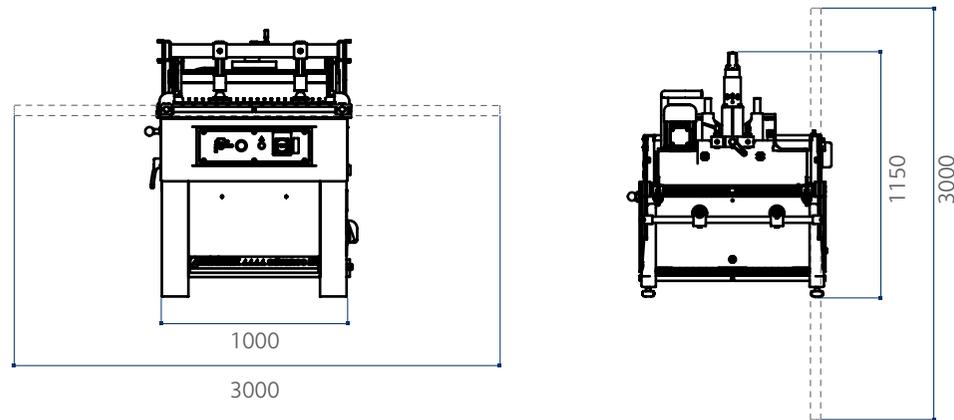

high-tech devices

Groups for Hinges.

For increased versatility, the quick-change chucks can be fitted with various types of bits for different operations, like boring hinges locations.

Maximum tool diameter	mm	40
Maximum drilling centre-to-centre	mm	640
Max. height of horizontal boring operation	mm	60
Spindle speed	rpm	2800
Min./max. panel thickness	mm	10/85
Max. panel width under the bridge	mm	833
Max. boring head stroke	mm	70
Boring head motor power	kW	1,8
Pneumatic system operating pressure	bar	6
Air consumption	NI/cycle	3,5
Exhaust outlets diameter	mm	80

woodturning lathe
t 124

Total Safety Machining.

Distance between centers	t 124
Centers height	mm 1150
4 spindle speeds (at 50 Hz)	mm 200
Three-phase motor	rpm 570 / 1000 / 1850 / 2500
	kW/Hz 1,5 (1,8) / 50 (60)

Find the complete technical specification at page 117

Structure
precision and safety

Optional Devices
versatile and complete

Woodturning lathe, for demanding DIY woodworkers and craftsmen, fast, cost-effective, easy-to-use, reliable.

woodturning lathe operating groups and optional devices

versatile and complete

Optional Devices.

Full range of devices to realize your creativeness.

precision and safety

Structure.

Maximum reliability and top precision, with its strong base, and total safety for the operator, thanks to the transparent guard.

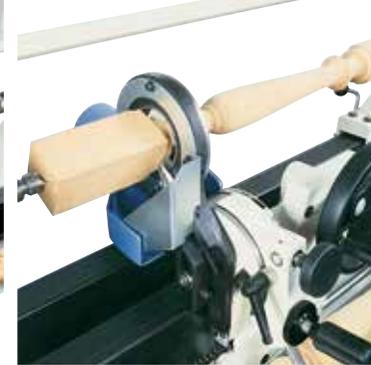

RANDO
TECHNIC

Copier.

Enables copying work at diameters greater or smaller than the template or pattern, feed by hand-wheel.

Mobile Steady Rest, with pre-cutting tool to guarantee perfect finishing.

Fixed Steady Rest, Reduces vibrations when turning long, thin components. The 'C' shape enables turning with hand tools.

Face Plate 300 mm diameter, ideal for large bowls.

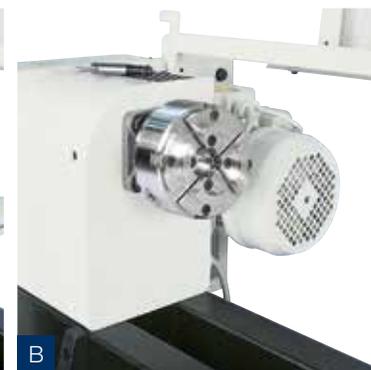

Cup or Screw Type Drive Benders: 40 mm diameter cup centre and 70 mm screw centre made from a single-piece of stainless steel. Necessary for turning small cups and bowls.

A) Sanding Unit, complete with adjustable angle work surface, guide and sanding disc.

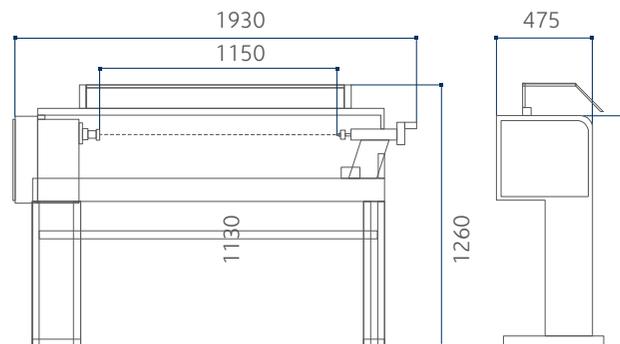

A

B

B) Four-jaw Chuck 125 mm diameter, for the rapid clamping of squared or circular components.

Structure
zero vibrations

Pulleys
speed under control

Belt Tensioning Device
practical to use

Belt sanding machines for edges and surfaces, extremely simple and reliable over time, for demanding DIY woodworkers and woodworking shops.

sander operating groups

zero vibrations

Structure.

Excellent stability and high precision machining without vibrations, for a top-level finished product, with the heavy duty structures and the perfect sliding of the sliding table. All the controls are easy to use and located within easy reach of the operator.

speed under control

Pulleys.

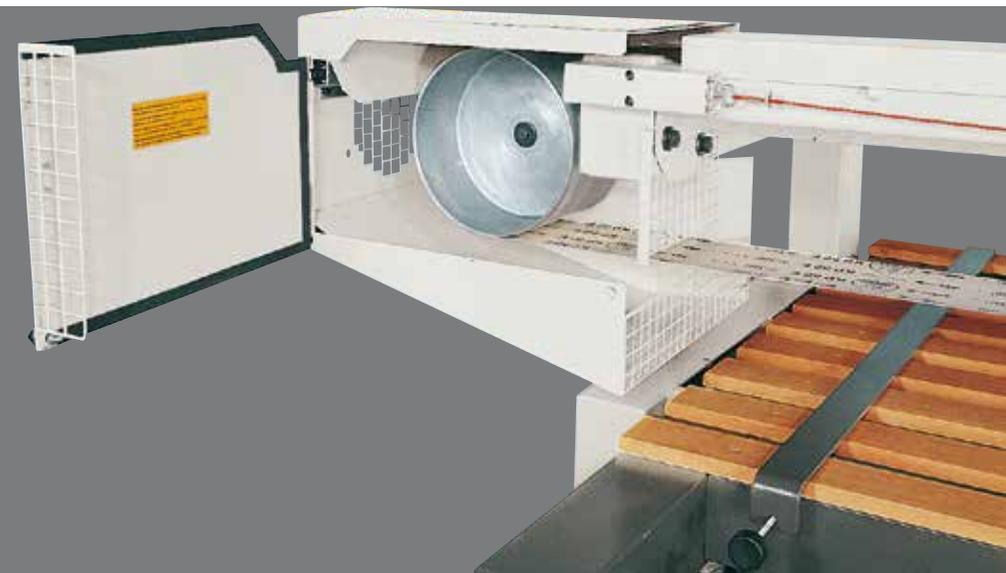

250 mm diameter pulleys give high belt speeds for non-clogging sanding even with resinous woods.

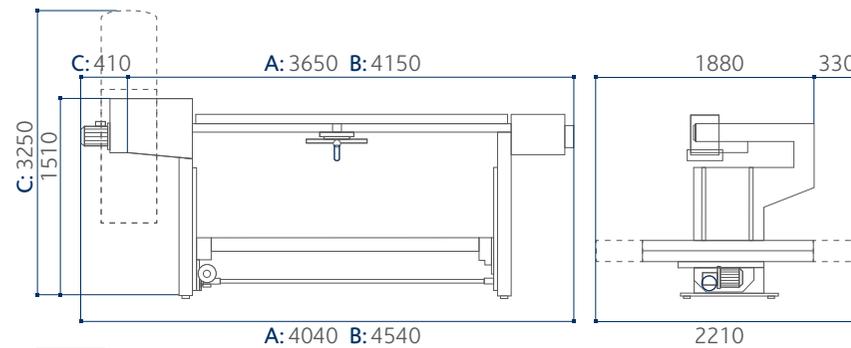

practical

Tensioning.

The belt tensioning device is extremely practical to use and enables the belt easy replacement.

PROMPT AND EXPERT TECHNICAL SUPPORT THROUGH A NETWORK OF 1000 TECHNICIANS AND AN INVENTORY OF 36,000 SPARE PARTS.

HIGHLY SPECIALISED TECHNICIANS, EFFICIENT
MANAGEMENT AND 6 SPARE PARTS BRANCHES
AROUND THE WORLD GUARANTEE A CLOSE,
SAFE AND EFFECTIVE TECHNICAL SUPPORT.

SERVICE

SCM provides a service that goes beyond the purchase, to guarantee the long term performance of your technological production system and peace of mind for your business.

A COMPLETE RANGE OF AFTER-SALES SERVICES

- installation and start-up of machines, cells, lines and systems
- tailored training programs
- telephone support to reduce times and costs when machines are not working
- preventive maintenance programs to guarantee long term performance
- complete renovation of machines and plants to renew the added value of the investments
- custom upgrading to update machines and plants and meet new production requirements

SPARE PARTS

SCM Group can count on 140 spare parts professionals worldwide to meet any request with real time shipments.

36,000 SPARE PARTS

Our spare parts inventory, with a value of 12 million euros, covers every single machine

SPARE PARTS GUARANTEED

We guarantee also hard to find parts, with 3,5 million euros invested in "critical" spare parts.

IMMEDIATE AVAILABILITY

Over 90% of orders received are carried out the same day thanks to the huge inventory available.

6 BRANCHES AROUND THE WORLD

The spare parts service can count on worldwide support (Rimini, Singapore, Shenzhen, Moscow, Atlanta, São Bento do Sul)

500 SHIPMENTS A DAY

THE STRONGEST WOOD TECHNOLOGIES ARE IN OUR DNA

SCM. A HERITAGE OF SKILLS IN A UNIQUE BRAND

Over 65 years of success gives SCM the centre stage in woodworking technology. This heritage results from bringing together the best know-how in machining and systems for wood-based manufacturing. SCM is present all over the world, brought to you by the widest distribution network in the industry.

65 years history

3 main production sites in Italy

300.000 square metres of production space

17.000 machines manufactured per year

90% export

20 foreign branches

350 agents and dealers

500 support technicians

500 registered patents

In SCM's DNA also strength and solidity of a great Group. The SCM Group is a world leader, manufacturing industrial equipment and components for machining the widest range of materials.

SCM GROUP, A HIGHLY SKILLED TEAM EXPERT IN INDUSTRIAL MACHINES AND COMPONENTS

INDUSTRIAL MACHINERY

Stand-alone machines, integrated systems and services dedicated to processing a wide range of materials.

WOODWORKING TECHNOLOGIES

TECHNOLOGIES FOR PROCESSING COMPOSITE MATERIALS, ALUMINIUM, PLASTIC, GLASS, STONE, METAL

INDUSTRIAL COMPONENTS

Technological components for the Group's machines and systems, for those of third-parties and the machinery industry.

SPINDLES AND TECHNOLOGICAL COMPONENTS
